

Brush and Pad selection

A full range of brush and pad drive systems are available for both models in order to provide the correct specification for the type of floor to be maintained. All brushes are fully interchangeable and can be varied to suit changing conditions or a change in location.

TwinTec Red... High Economic Performance

The TwinTec Economy 4045 is designed to provide an exceptional "value for money" professional machine.

ETB4045

Optional PadLoc pad drive system

Structofoam wet pick up

The ETB4045 has a number of cost saving variations introduced into the specification without loss of performance or operating life. The LoLine chassis is manufactured in nutex epoxy powder coated steel in place of stainless steel; the wet pick up floor tool is Structofoam rather than aluminium and the machine is fitted with fully sealed 70Ahr gel batteries.

The balance of the specification is fully standard with its tilting Structofoam brush deck, heavy duty geared brush motor, polyform clean and dirty water tanks, TwinFlo suction motor, built in battery charging system, fully adjustable handle and Nutronic controls.

ETB4045, designed not just to clean but to clean to a professional standard.

ET4045

The very big advantage of the cable electric machines is the exceptional power and performance available to clean floors that are both rough and excessively dirty.

Two cost saving specification changes have been made compared with the TT premium model, being a nutex epoxy powder coated chassis in place of stainless steel and a Structofoam floor tool in place of aluminium.

Other than these two changes the balance of the hardworking specification remains unchanged.

Heavy duty brush drive and planetary gearbox, Structofoam tilting brush deck, rugged polyform clean and dirty water tanks, Twinflo wet pick up system, fully adjustable operator handle and simple control system.

As a machine it's as strong as an Ox and floors will be both clean and as dry as a bone and, in terms of cleaning performance, you won't find better.

Superb power and performance to cut through the most extreme levels of grime.
